## Comprehensive Report for Custom Values

Comprehensive Report for Custom Values provides schools with a *detailed view of student performance in custom fields like procedures, diagnostics, medications, and more, during placements across the selected courses.*

Comprehensive Report for Custom Values enables Easy tracking of students' progress against graduation requirements across programs, courses, and rotations.

### Use case

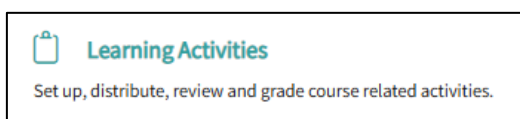

- A student during the clinical placement logs the daily findings and tasks performed in the patient log.
- The students specify details such as diagnosis, procedures, medications or any other school-defined tasks (custom values) related to patientcare in the patient log.
- The schools can also define the minimum and preferred rotation requirements to record in the patient log.
- The schools have minimum graduation requirements to track student performances in areas such as procedure, diagnosis, and similar during the clinical placement of the student.

*Comprehensive Report for Custom Values provides a holistic view of a student's performance across Program/Course Offerings, Rotations, and Placements, helping schools assess progress effectively.*

## Generate Comprehensive Report for Custom Values

To setup a Generate Comprehensive Report for Custom Values, follow the steps provided below.

1. **Login** to the *Exxat Prism* using your **university login credentials**.
2. Go to **Learning Activities** in the *Placement Management* section.

3. You can access the **Comprehensive Report for Custom Values** in the following ways.

- [illegible]

- [illegible]

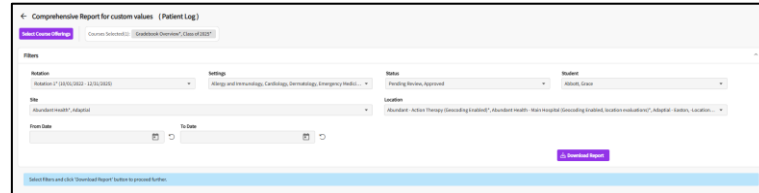

- [illegible]

- [illegible]

This step is applicable for all the 3 ways available to access the Comprehensive Report for custom values. See [step 3](#) for more information.

- When you access the comprehensive report for custom values via the *Learning Activity Group the Filters Rotation, Settings. Status, Student, Site, and Location are picked automatically for the selected Learning Activity Group.*

You can also change the **Filter** options, if required.

- Select the **Date range** to download the report. You can also skip the step to download report for all the data available.

- Click **Download Report** button, to download the report.

Report downloads in an **excel file (.xlsx)**.
